ROHIT RANJAN

Senior Quality Engineer | SDET | Selenium WebDriver | Java

+91-7992461393 | ranjan.rohit.0412@gmail.com | linkedin.com/in/ranjanrohit412 | Portfolio

PROFESSIONAL SUMMARY

Results-driven QA Automation Engineer with 5+ years of experience in manual and automation testing — functional, regression, smoke, sanity, exploratory, UI, API, and database testing. Strong hands-on expertise in Selenium WebDriver, Java, TestNG, Postman, SQL, MySQL, Maven, Jenkins, Git, JIRA, and Xray. Builds scalable frameworks (POM, Data-Driven, Hybrid), integrates tests into CI/CD pipelines, applies BVA and equivalence partitioning for test case design, and collaborates with cross-functional Agile Scrum teams to support reliable software delivery. Domain: BFS.

TECHNICAL SKILLS & COMPETENCIES

Automation: Selenium WebDriver, TestNG

Programming: Java, SQL, Python, JavaScript

API Testing: REST API, Postman

Testing Types: Functional, Regression, Smoke, Sanity, Exploratory, UAT, Database, API

Database: SQL, MySQL, Joins, Stored Procedures, ETL Validation

CI/CD & Build: Maven, Jenkins, GitHub Actions

Frameworks: POM, Robot Framework Data-Driven, Hybrid

Version Control: Git, GitHub

Test Management: JIRA, Xray

Test Design: Test Case Design, BVA, Equivalence Partitioning

Web Technologies: XPath, HTML, CSS

Methodologies: Agile Scrum, SDLC, STLC, Defect Management

Core Competencies: Automation Strategy, Framework Development

PROFESSIONAL EXPERIENCE

Senior Quality Engineer | LTIMindtree **Jul 2026 – Present**

- Analyse business and functional requirements to design test scenarios, test cases, and requirement traceability matrices; execute functional, regression, smoke, sanity, and exploratory testing across web applications.
- Develop and maintain Selenium WebDriver automation scripts (Java, TestNG, POM) to expand automation coverage and ensure consistent, reliable test execution.
- Perform API testing using Postman and execute SQL queries (joins, stored procedures) for database and ETL validation; investigate issues and report quality metrics to stakeholders.

Software Quality Engineer | Infosys Pvt. Ltd. **Feb 2026 – Jun 2026**

- Designed and built Selenium WebDriver automation framework (Java, TestNG, POM) converting 700+ manual test cases into automated scripts; reduced regression cycle time by 40%.
- Integrated automation suite with Jenkins CI/CD pipelines for continuous, repeatable test execution across multiple concurrent project releases.
- Analysed business requirements to prepare test scenarios, test cases, and requirement traceability matrices; executed functional, regression, and UAT testing.
- Debugged and resolved automation failures to improve suite stability; tracked defects in JIRA, provided constructive feedback to development teams, and reported quality metrics to stakeholders.

PERSONAL PROJECT

Periodic Table Web Project: ranjanr0412.github.io/periodicTable/ | Source Code: GitHub/SourceCode

EDUCATION

Bachelor of Technology (B.Tech.) in Electrical Engineering
Dr. B.C. Roy Engineering College 2017 – 2021

ACHIEVEMENTS

- Received the Infosys Insta Award six times for consistently delivering high-quality work and meeting project deadlines.
- Received the Rising Star Award three times within the first two years of employment in recognition of strong performance and professional growth.
